- 100% LED Lighting Solutions
- Kit or Custom. Your Choice.
- What You Want. When You Want It.
- Solutions for Most Trade Show Budgets

Since 2007, Eco-systems Sustainable has been the leader in contemporary, eco-friendly trade show exhibits by designing modern displays. Make no mistake. The displays are green. They just don't flaunt their sustainability with a "crunchy stick and twig" exterior.

Instead, Eco-systems balances client-driven design with responsible materials such as **MODUL recycled(able) aluminum, FSC Wood, and 100% recycled plastics, foam, and cardboard.** Eco's award-winning designers are the heart and soul of every remarkable project. Their distinctive vision is driven by natural curves, innovative counters, and practical accessories. We've learn that that most exhibitors want a sustainable display... if it's **intelligently-designed, well-built, and at a fair price.**

Beautiful. Practical. Affordable. Responsible. Always the Eco-systems Sustainable Difference.
